

MEI QINGYU

EMAIL: PKUMQY@FOXMAIL.COM | GITHUB

TELEPHONE: XXX-XXXX

BEIJING, CHINA

BORN IN JUNE, 2005 | MALE | COLLEGE OF ENGINEERING, PEKING UNIVERSITY

EDUCATION

Peking University, College of Engineering, | GPA: 3.742 of 4.0, ranking 3rd Sept. 2022-present
Bachelor of Engineering | Robotics Engineering

Core Courses: Theoretical Mechanics, Advanced Dynamics, Introduction to Robotics, Principles of Automatic Control, Signals and Systems, Analog and Digital Electronics, Robotics Dynamics, Machine Learning, Fundamentals of Large Language Models

Peking University, School of Advanced Manufacturing and Robotics
Master of Mechanical Engineering | Commencing Sept. 2026

ACADEMIC AWARDS

the Merit Student of Peking University	Sept. 2023
the Third Prize of Peking University	Sept. 2024
the Model Student of Academic Records	Sept. 2024
Pacemaker to Merit Student	Sept. 2025
National Scholarship	Sept. 2025

SKILLS

Software (partial list): AutoDesk Fusion | Solidworks
Languages (partial list): C++ | C Language | MatLab | Python
English Level: National College English Test Band 6 Score: 555

PROJECTS

Project Participant | SLAM of Wheeled Robots 2024-2025
with Collaborative Robotic Arm Grasping

- Implemented 2D map construction in indoor environments using LiDAR on a mobile robot platform
- Utilized depth camera to generate spatial point clouds as physical obstacles for robotic arm grasping path planning
- Achieved robot navigation based on the constructed map, integrating collaborative grasping with robotic arm

Project Participant | Semantic Navigation, present
Point Cloud Semantic Segmentation and Multi-Robot Collaboration

- Engaged in semantic navigation technology research and point cloud semantic segmentation development
- Explored multi-robot collaboration mechanisms for coordinated tasks

RESEARCH INTERESTS

AI + Robotics, including Embodied Intelligence, VLA (Vision-Language-Action), Multimodal Fusion, and Multi-Robot Collaboration.
